

## QUESTIONNAIRE ON MARINE CADASTRE

In June 2014, a joint project between CLGE (Council of European Geodetic Surveyors) and PCC (Permanent Committee on Cadastre) was launched. Other associations such as Eurogeographics, EULIS and ELRA also joined this project.

The output will be to create a case study about Marine Cadastre. Other European associations joined this project which could give useful guidelines for European Countries that intend to create a marine cadastre. By highlighting key aspects, such as the need for standards and to share best practice the intention is to enable national level projects to be compatible with each other and inter-operable across Europe.

There are four stages to the project:

1. To collate the different texts, documents, directives etc. from the European Union which deal with the subject of Marine Cadastre.
2. To issue a questionnaire to interested parties and expert groups.
3. To analyse the responses to the consultation with a view to define the most important issues that will need to be addressed in the creation of a Marine Cadastre e.g. data themes, data quality, data currency/maintenance, formats, coordinate systems, understanding the user community/customer, choice of platform (technology, tools, functionality, support for devices etc.), business models etc.

4. To synthesis these findings in a short report.

Please find below a short questionnaire that we ask you to complete and return by 30<sup>th</sup> May 2015 to Nicolas SMITH, CLGE Vice President. We are inviting responses from broad range of parties ranging from those who are full engaged in Marine Cadastre projects to those that might have more of passing interest but wish to provide use with some useful advice or contacts. If you know of an individual, organisation or association that would interested and could make a useful contribution please forward the questionnaire directly to them.

Thank you for your cooperation,

Nicolas SMITH, CLGE Vice President

## Questionnaire on Marine Cadastre

### 1. Respondents contact details:

- a) Given name:
- b) Surname:
- c) Organization:
- d) Role:
- e) email:
- f) Mobile phone:
- g) Other relevant information about you or your organization:

### 2. Creation of a working group

- a) Are you willing to actively participate in a working group on Marine Cadastre?
- b) If the answer to 2 a) above is yes, please below your availability to attend an inaugural meeting in Paris (FR) during May or June 2015:
  - Monday 15th June  OK
  - Monday 22nd June  OK
  - Friday 19th June:  OK
  - Friday 26th June :  OK
- c) If the answer to 2 b) above is no, are you willing to be contacted by the Working Group during the project for example to respond to a further questions or to review our findings?
- d) Is there any other relevant person or organisation in your country that with whom we should engage?
- e) If the answer to 2 d) above is yes, please can you provide contact details or forward this questionnaire to them?
- f) Do you required further information about the Working Group in order to respond and if so what?:

### 3. Status of Marine Cadastre projects in your country

- a. Are you aware of Marine Cadastre/maritime data project or existing system in your country?
- b. If the answer to 3 d) above is yes
  - i. What is the name of the project or system?
  - ii. Which is the lead organization hold it ?
  - iii. Does it have a public web site or internet resources, if so where?
  - iv. What problem does it address?
  - v. What are its key characteristics and limitations?
  - vi. Is INSPIRE compliant?
  - vii. What marine area is concerned?
- c. In your country has any Marine Data already been made freely available e.g. open data?
- d. If the answer to 3 c) above is yes,
  - i. Which data?
  - ii. Which organisation collects and maintains them?
  - iii. What sort of data is include e.g maps, datasets, 3D models, textual data, environmental information, etc.?
- e. Do you have expertise or in collecting, managing or publishing marine data or can you refer us to somebody who does?
- f. If the answer to 3 e) above is yes, can you describe your expertise and experience and how believe you could contribute to the working group?
- g. In your Country are you aware of any organisations from either the public or private that are interested in making or planning to make or using Open Data in future?

- h. In your country, do you know some if some marine data is difficult to obtain, perhaps due to price or other restrictions and what can be done to improve this situation?
- i. In your country, which (if any) national agencies or organisations are responsible for marine protection?
- j. Are there any other points relating to Marine Cadastre, in your country, which you would like to bring to the attention of the Working Group. If yes, please describe them here:

Please return your complete Questionnaire before end of May to Nicolas SMITH, CLGE Vice President
