Croatia has a horseshoe shape...
...that extends from Vukovar in the east (Slavonia)...
...to Varaždin in the north (Zagorje)...

![Varaždin Castle](image-url)
...to the mountain region in the central part (Lika and Gorski Kotar)...
...to the western part of Croatia (Rovinj - Istria)...
... along the Adriatic Sea coast (1.777 km) there are 1,244 islands...

... Brijuni
...Omiš...
Šibenik...
... to Dubrovnik in the far south.
DID YOU KNOW ABOUT CROATIA?

Croatia was acknowledged for the **first time in history on 7 June 879**, when Pope John VIII granted Duke Branimir the title dux Croatorum.

Some of the most recent archaeological finds, which date back to approximately 6300 BC, indicate that **Vinkovci (Slavonia) is the oldest European town**, with an urban continuity of over 8,000 years.

**Taking the surface area of the country and the number of inhabitants into account, Croatia leads the countries of Southeast Europe in terms of highways, and is ahead of many other members of the European Union.**
DID YOU KNOW ABOUT CROATIA?

Nikola Tesla **inventor of alternating current** was born in 1856 in small village Smiljan in Croatia.

The **smallest town in the world** is Hum, which is in Istria with a population of only 23 people.

The **cravat**, the symbol of culture and elegance, originates from Croatia. It used to be a part of the uniform of the Croatian soldiers in the 17th century.
