Hungarian PCC

Proposals for a closer working relationship

Dave Lovell Executive Director
June 2011

Benefits of a Closer working relationship

- A joint proposal of EuroGeographics and PCC to their members;
- Perceived advantages:
 - A single voice for cadastre in Europe;
 - Strong and active representation in EU policy circles (Commission and Parliament)
 - Clearer representation of cadastral issues;
 - A physical presence in Brussels;
 - A permanent 'secretariat' and continuity of administrative issues;
 - Tangible projects advancing Cadastre nationally and at European level e.g. ESDIN, EuroGeoCloud and the European Cadastral Parcel Index project;
 - Financial support for PCC activities;
 - Enhanced profile for cadastral issues.

And finally

Together we are stronger

Thank you!
